ILLUSTRATED COVERS

When was the last time you drew with complete abandon? I mean, ZERO judgement of your work... jury's out on whether that's actually possible in adulthood, but I like to think we can try! And why shouldn't we? Drawing like we did as children; it's freeing and apparently chic again... Below are a set of samples I prepared. It's not hard to see which piece I wrestled with, and the sad part is, I actually loved it before my control started to take over. My best wishes to you - drawing like you did as a child might be the most difficult task we've undertaken so far...
